

# FUTURE INDUSTRIAL TECHNOLOGIES

PREVENTING TOMORROW'S INJURIES TODAY™

## Start 2025 Strong: Set Your Intentions for Higher Production And Less Workers' Comp Costs

A New Year, A Safer Workplace: Prevent Injuries, Save Worker's Comp Costs

As we embark on a new year, it's the perfect time to set clear intentions for preventing painful and costly injuries. Whether you're managing a small team or an entire workforce, prioritizing injury prevention can make 2025 your safest and most productive year yet. By addressing workplace injuries proactively and investing in [Backsafe®](#) employee training, you can protect your greatest asset—your people—and significantly reduce workers' compensation costs.

The numbers speak for themselves: the cost of workplace injuries goes beyond medical bills. It impacts employee morale, productivity, and your bottom line. This year, let's shift the focus from *reacting* to injuries to *preventing* them altogether. Simple steps such as culturalizing the Backsafe 3-Rules and the [Backsafe](#) stretches can change lives, reduce turnover, and reduce worker's comp costs significantly.

Setting a safety intention isn't just about reducing risks—it's about fostering a culture of care and accountability. Employees are more engaged when they see their employer prioritizing their well-being. Prevention isn't just a policy; it's a mindset. The [Backsafe 3-year training program](#) includes the implementation; refresher training; and Supervisor Champion instruction.

Together, we can make 2025 a year of fewer injuries, lower costs, and greater employee satisfaction. Let us partner with you to create a customized plan to help meet your production and safety goals.

Ready to make 2025 a record breaking year for your operation? Contact us (1-800-775-2225 or [email me](mailto:dennis@backsafe.com)) to make 2025 a year to remember. We teach things that your employees don't know, but should!
